

HEALTHCARE DESIGN

ARCHITECTURE | BUILDING CONSULTANCY | EMPLOYER'S AGENT

hunters

At Hunters we design our services around you.

Experienced and forward thinking

Our portfolio spans masterplanning, new build and refurbishment, all working directly with different healthcare providers. We research current and emerging best practice to enhance a project's aspirations and then develop designs to suit the users; staff, patients and visitors, whatever part of the healthcare portfolio we work on.

We make life easier

Working with clients, we develop a clear journey and support clients with presentations and feedback, whether for a complicated occupied building or a vacated site. Our project planning provides clarity, with clear communications from our experienced team, making delivery that bit easier for you.

Engagement from day one

We thrive on projects with multiple stakeholders with high levels of public interest and are known for our 'getting on' attitude, whilst leading the design direction. We work hard to engage with all stakeholders, whether internal or external, to create new healthcare facilities that work for all.

Designing with a difference

We combine technical know-how, practical planning and ideas which together improves the user experience. From the start, clients can visualise their new environments via walk throughs, plans and 3D's, topped and tailed with empathy and flair.

"I can give no higher recommendation than to state I have in the last week again commissioned Hunters to provide further strategic advice for the Trusts top clinical priority"

Charles Hanford, Director of Estates, Facilities & Capital Projects

Team Leads

Hunters healthcare has over 15 years of experience. The team delivers a wide range of projects covering refurbishments, new build and estate masterplans. We have architects, designers, technical experts, visualisers and strong project management, to ensure that the project runs smoothly.

Areas of Work

We work in: Primary Care, Acute Care, Mental Healthcare and Specialist Pallative Care.

01. Inpatient

02. Outpatients & Diagnostics

03. Emergency & Theatres

04. Life Sciences & Offices

05. Mental Health & Dementia

06. Primary Care

07. Estates Strategy & Planning

"Hunters came up with good patient centred and practical design solutions and were proactive in the contract administrative functions on site, understanding the need for innovative and equitable design solutions"

Andrew Panniker, Director Capital & Estates, Royal Free Hospital

Woking & Sam Beare Hospice, Woking ↑

01. Inpatient

We combine patient-centred and clinically-focused experiences in our designs. The practical needs can be different, but the aspirations are often the same, with human-centric spaces to aid efficient delivery of healthcare, develop smooth recovery and provide sympathetic spaces which value; patients, relatives, nursing staff and consultants. Our clients include the NHS, private hospitals and hospices.

02. Outpatients & Diagnostics

Strong space planning, clear wayfinding and a welcoming experience are fundamental to help guide patients to their destination. Uplifting waiting rooms and easy to reach consulting rooms extend the positive journey. We have designed and built a range of facilities for the NHS and private hospitals including sexual health clinics, cancer units, opthamology and paediatric clinics.

03. Emergency & Theatres

As emergency rooms and theatres experience more pressure from patient volumes, our designs focus on improving patient and staff flows, delivering a clear customer journey through logical sequencing of spaces, prominent information and signage to create happier, more peaceful environments in assessment and treatment areas. We work closely with clients, staff and patients through the design enabling our clients to have world class healthcare technology and spaces.

04. Life Sciences & Offices

Away from the public face of hospitals there are the spaces the public rarely see, with research, administration and places to study. We have designed spaces for medical schools, NHS trusts and private companies mixing commercial aspirations with practical solutions. These are the spaces where healthcare moves forward as research is nurtured and innovation fed.

05. Mental Health & Dementia

Our team has specialist design experience in dementia and mental health, creating award-winning internationally recognised environments. We design homes and wards with the users considering security, colour palettes, textures, light, care and facilities to help those with mental health issues recover and those with dementia experience comfortable, end of life care. Dignity, compassion and familiarity are woven into our architecture so residents can have a more positive emotional and physical experience.

06. Primary Care

We are skilled at bringing multiple stakeholders together to deliver a shared vision for integrated community services. Flexibility and durability are key demands for the clinical spaces with welcoming engaging and easy to navigate public facing spaces. Our projects include drop in centres, GP surgeries, dental surgeries, maternity care and supporting commercial activity and other primary care services.
